

SUMMARY

Result-oriented Full Stack Java Developer with expertise in backend system design and full-stack development. Completed an intensive 6-month training at Zoho School for Graduate Studies (ZSGS), building strong skills in Java, Spring Boot, React.js, MySQL, and scalable application architecture using industry design patterns.

TECHNICAL SKILLS

Core Java

OOP & SOLID Principles, Collections & Generics, Stream API, Multithreading, Exception Handling

Backend

Java Servlets, Spring Boot, JWT Authentication, REST API Design

Frontend

React.js, HTML5 & CSS3, JavaScript (ES6+)

Database

MySQL, JDBC Connectivity

Architecture

Layered Architecture, MVC / MVP Patterns, Design Patterns

EDUCATION

B.E. Computer Science

P.S.R.R College, Sivakasi

CGPA: 8.7 / 10

HSC & SSLC

A.K.D.R Girls HSS

Score: 87%

ACHIEVEMENTS

150+	LeetCode Problems
50+	HackerRank Java
10+	GitHub Repositories
4	Full-Scale Java Apps

EXPERIENCE

Full-Stack Java Developer — Training Program

Zoho School for Graduate Studies (ZSGS) | 6 Months

- Mastered Core Java — OOP, Collections, Stream API, Multithreading, Exception Handling.
- Built RESTful backends using Java Servlets & Spring Boot with dependency injection and layered architecture.
- Developed responsive frontends using React.js (hooks, state management), HTML5/CSS3 & JavaScript.
- Designed and implemented MySQL schemas with JDBC for robust data persistence.
- Applied SOLID principles, MVC/MVP patterns & design patterns across 4 end-to-end applications.

PROJECTS

Makkal Kural — Smart Civic Service Governance Platform

Java | Servlets | HTML | CSS | JavaScript | MySQL | MVC | LayeredArchitecture

- Built a full-stack civic grievance management platform using Java Servlets, HTML, CSS, JavaScript, and MySQL.
- Implemented role-based access control (RBAC) for Admin, Officer, and Citizen modules.
- Secured user access with JWT authentication for scalable, stateless authorization.
- Designed a normalized MySQL schema for complaint and user lifecycle management.
- Applied MVC and Layered Architecture for clean, modular, and maintainable code.

Share Meal — Food Donation Platform

CoreJava | LayeredArchitecture | StreamAPI | Generics | Collections

- Built a console-based food donation platform connecting donors with NGOs.
- Applied Layered Architecture for clean separation of business logic and data access.
- Implemented donation listing, NGO registration, and claim management workflows.
- Used reusable repository design and validation mechanisms for data integrity.

Arivagam — Quiz Application

CoreJava | OOP | Collections | Stream API | Generics | File I/O

- Developed a console-based quiz app with multiple categories and difficulty levels.
- Implemented real-time scoring and a leaderboard using Collections & Stream API.
- Persisted scores across sessions with File I/O for retrieval and ranking.
- Designed modular class structures for scalable and maintainable application flow.
